MARCH 6, 2024  
6:00PM

**SD51 is embarking on the development of a Long-Range Facilities Plan (LRFP) and is seeking input from our school communities!**

**A Long-Range Facilities Plan (LRFP) is a framework to guide facilities planning throughout a school district. The goal of the LRFP is to understand the District's facility needs into the future, and to ensure district facilities are appropriately aligned with student needs and can support both current and projected enrolment. The LRFP process will allow the Board to remain focused on ensuring they are spending limited resources effectively to provide the best programs possible for students.**

**We are encouraging all members of our school communities to participate in the public consultation sessions.**

**If you are unable to attend in-person, an online survey will be available after the sessions to provide comments on the draft recommendations.**

Questions or concerns, please  
contact the School Board Office
